

Identify NetIP custom Win32 Apps

1. Go to **App Catalog**

The screenshot shows a dark-themed application interface for filtering apps. At the top, there are four buttons: a list icon, a grid icon (which is highlighted with a red box), a sort icon, and a filter icon (funnel with a dropdown arrow, also highlighted with a red box). A red circle with the number '1' is placed next to the filter icon, with a red arrow pointing to it from the 'Last Updated' section. Below the buttons are several filter sections: 'Last Updated' with a date range selector 'Start Date - End Date'; 'Vendor' with a dropdown menu; 'Language' with a dropdown menu; 'Architecture' with a dropdown menu; and 'Source' with two checkboxes: 'Patch My PC Apps' (unchecked) and 'NetIP' (checked). The 'NetIP' checkbox is highlighted with a red box, and a red circle with the number '2' is next to it, with a red arrow pointing to it from the right. At the bottom, the 'Operation System (OS)' section is partially visible.

- Choose "Filters"
2. You can always verify the source of NetIP Apps ->
